

The Office of Scientific Information of the Comunidad de Madrid is addressed to play an important role in the interaction between science and society. As there is a real need to promote the scientific culture and public participation in science and technology issues. The Office of Scientific Information tries to improve the scientific information approach and to establish a dialogue with scientists and citizens.

Aim

Fostering public participation in science and technology by making possible the open access to scientific information and offering specialized scientific advice

Main Services

- To offer daily scientific information
- To analyze R&D current issues in depth
- To deal reports and interviews to the main research groups in Madrid region
- To organize events and debates
- To establish fluent channels between scientific community and the media

Capacities and Target Groups

The Office services are addressed to students, teachers, researchers, scientists, technicians, R&D managers, journalists and citizens. The Office pretends to bring together science and citizenship, promoting cooperation and achieving consensus in scientific decision making.
